

**CENTRAL MAINE POWER COMPANY
RESPONSE TO ORAL DATA REQUEST NO. 1
DOCKET No. 2008-255**

**CONFIDENTIAL
MATERIALS
ATTACHED**

December 19, 2008

ODR-01-61

- Q.** Please provide historic outage data (since 2000) for customers who have behind the meter generation and provide their demand for those periods.
- A.** CMP has generator output information for some behind-the-meter, internal generation at Newpage, Sappi Somerset, and Verso Bucksport, but CMP has no metering for behind-the-meter, internal generation at Verso Androscoggin. In response to this request, for the period January 2003 through December 8, 2008, CMP provides customer loads at the time when at least one generator was registering zero output for an hour at each of these facilities (Attachment 1). CMP also is providing hourly generator output and customer loads for each hour for this same period (Attachment 2).

The attachments to this response are confidential and voluminous and are being provided on CD under the protection of Protective Order No. 1: Confidential Retail Customer and Market Participant Information, dated July 27, 2008.

Response Prepared By:

Ann L. Theriault
Manager, Pricing and Analysis
Central Maine Power Company

Response Submitted By:

Paul A. Dumais
Director, Regulatory Services
Central Maine Power Company

Attachments on CD:

1. **Confidential** spreadsheet showing customer loads on CMP's system when generator output is zero for Newpage, Sappi Somerset, and Verso Bucksport for the period January 1, 2003 through December 8, 2008
2. **Confidential** spreadsheet showing hourly generator output and customer load on CMP's system for Newpage, Sappi Somerset, and Verso Bucksport for the period January 1, 2003 through December 8, 2008
