

**CENTRAL MAINE POWER COMPANY  
RESPONSE TO ORAL DATA REQUEST NO. 3  
DOCKET No. 2008-255**

November 26, 2008

**ODR-03-13**

- Q.** Please provide the data regarding the rate impact of MPRP on Maine Ratepayers if MPRP did not receive PTF treatment and was not socialized.
- A.** Please see Attachment 1, which provides delivery price estimates for residential, commercial, and industrial customers assuming no PTF treatment or cost socialization for MPRP. As stated at the technical conferences, this is a very unlikely outcome for the cost treatment of MPRP. In the attached calculation, CMP has assumed that all other transmission projects that are included in the Regional System Plan are constructed and included in the delivery price forecast with PTF treatment (i.e. their costs are socialized in RNS transmission rates).
